Installation Tools
- ½” Socket with Ratchet
- ½” Wrench
- Pliers

Hardware
A. Qty (1) 5/16 x 3.5” cylinder ram bolt
B. Qty (2) small washers
C. Qty (2) cylinder bolt bushings
D. Qty (1) large cylinder ram spacer
E. Qty (1) small cylinder ram spacer
F. Qty (1) 5/16” low-profile mounting nut

Installation Instructions:
Step 1 Remove old bolt with installation tools. Note: when finished all lock nuts should be all on one side.
Step 2 Insert bolt A through washer B with flat side of bushing C facing towards washer B.
Step 3 Insert dressed bolt A through U-channel and large ram spacer D. Note: large ram cylinder spacer should be on the same side as the 90 degree fitting on cylinder.
Step 4 Push remaining bolt A on through hydraulic cylinder ram, small bushing ram spacer E and U-channel.
Step 5 Place small bushing C onto bolt A with small flange facing towards U-channel hole followed by washer B.
Step 6 Finish by threading nut F on and tighten to 48 inch pounds / 4 pounds of torque.
